Sep, 2021

Mid-term project (practical exercise)

- Requirement for signature
- Groups of 3 students (~12 groups)
 - Strong cooperation
- Main goal for the end of the semester:
 - Use the lecture material in practice
 - One running program with User Interface
 - Platform: small screen tablet (max 10")
 (e.g. Windows 10, Android, iOS, or anything else)
 - Plan & design, implementation, evaluation
 - Human-Computer Interaction aspects

USER INTERFACE EXAMPLES OF EARLIER GROUPS

Earlier apps from HCI: 2011

Samsung SmartTV

- Several available SmartTV platforms
- Programming: HTML / JavaScript
- Limited interface options

Earlier apps from HCI: 2011, good

Earlier apps from HCI: 2011, less good

2011 Smart TV Emulator

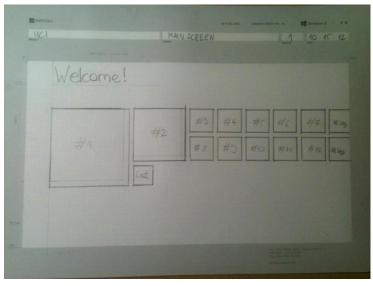

SAMSUNG

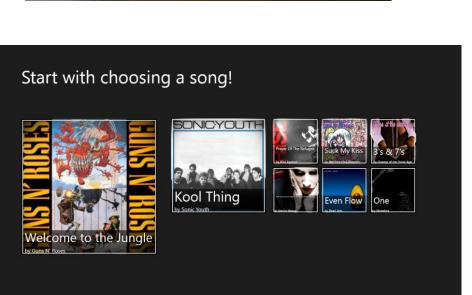

Earlier apps from HCI: 2012

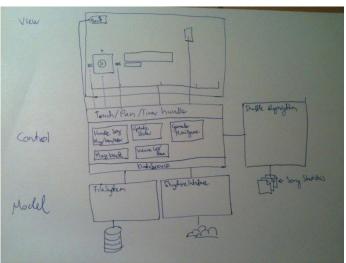

- Windows 8, Metro design
 - First version: 2012 October
 - Developer version
 - C# and XAML

Earlier apps from HCI: 2012, good

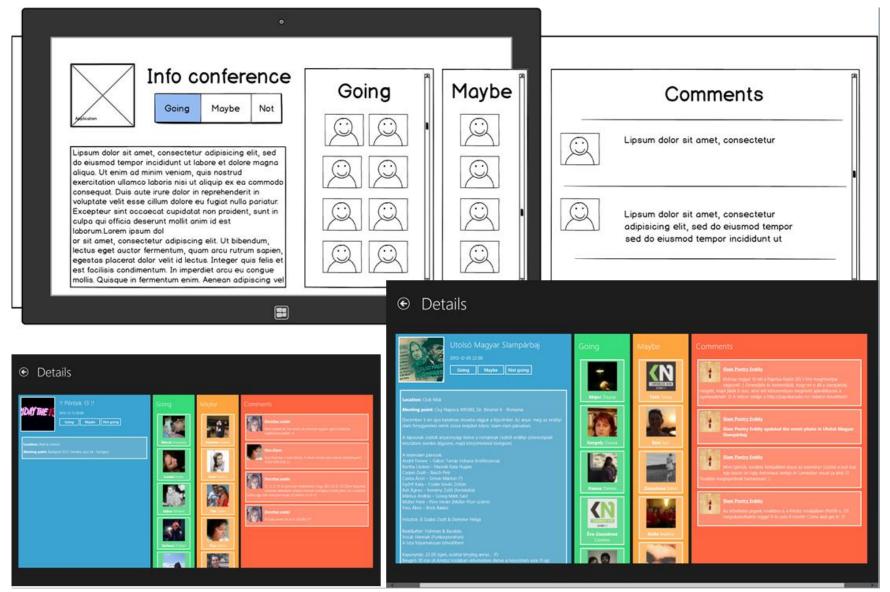

Earlier apps from HCI: 2012, less good

Earlier apps from HCI: 2013, good

Earlier apps from HCI: 2014, good

Earlier apps from HCI: 2015

Small screen tablet / smartphone

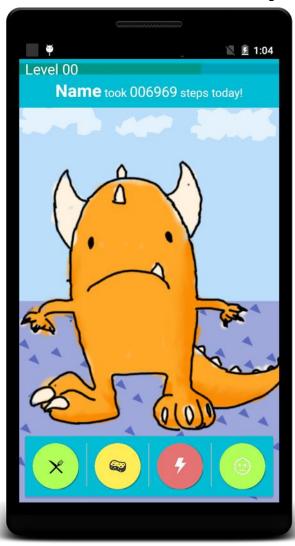

Earlier apps from HCI: 2015, good

Shuffle, http://bit.ly/1lu59Ka

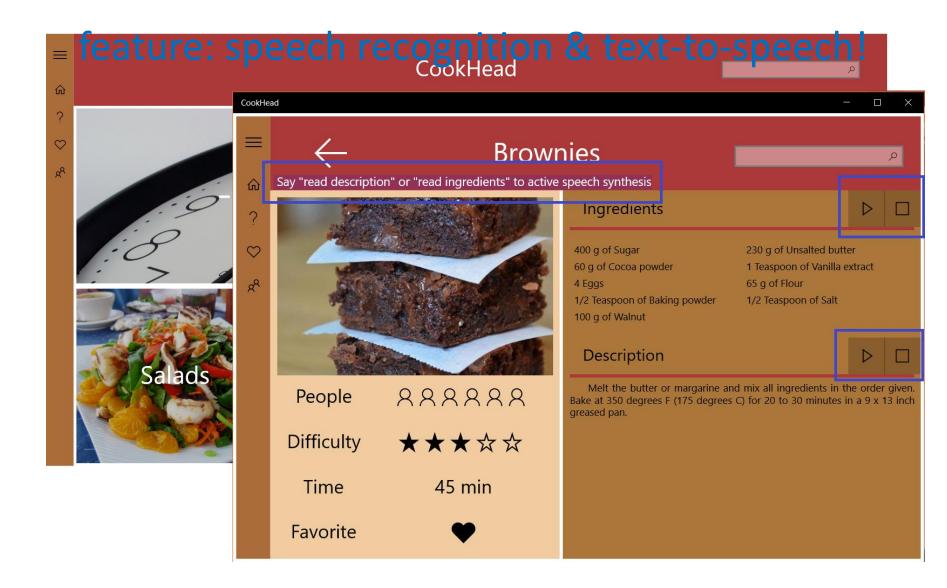

Earlier apps from HCI: 2015, good

Earlier apps from HCI: 2016, good

- You can choose from 3 offered topics
 - 1) Smart ordering in a restaurant
 - 2) Morning app
 - 3) Smart city related

- Additional requirement: speech modality
 - use Text-to-Speech Synthesis OR
 - use Automatic Speech Recognition

- 1) Smart ordering in a restaurant
 - User side and/or restaurant side (client + backoffice)
 - Single user / multiple users / adults / children
 - How to order the menu efficiently,
 without a waitor/waitress

- 2) Morning app
 - Smart alarm clock / wakeup TODO list
 - News reading / morning coffee suggestion / etc
 - Weather info / do you need an umbrella today?
 - Route planning to work
 - Anything that can help the user during the morning preparation

- 3) Smart city related
 - Smart home, home automation
 - Smart billing
 - Can be related to Smart city secondary specialization (e.g. user interface for a specific hardware)

Let's create groups!

- Design, implement and evaluate User Interface
- You can choose from 3 offered topics
 - 1) Smart ordering in a restaurant
 - 2) Morning app
 - 3) Smart city related
- Must use speech technology (TTS or ASR)
- Upload until Sep 13 Monday 8:00
